WORK HISTORY

TURO

Tech Stack : JavaScript, UI/UX Prototyping, Node JS, TypeScript, Redux, React JS.
Role : Crafted 45% of the project's backbone, excelling in both frontend and backend development.

Turo is a large dynamic car-sharing marketplace, enabling seamless interactions between Hosts and Users. Hosts can offer cars for sharing at specified rates, and Users can choose vehicles based on budget and preferences like Capacity and Mileage.

ANGELIFYBEAUTY

Tech Stack : Shopify, AI, Node JS, JavaScript, AWS, Web Scraping, Graphic designing, API Development, HTML5 & CSS3 etc.
Role: Designed and developed the entire platform.

AngelifyBeauty's captivating Shopify site offers beauty products complemented by AI robots on AWS, managing 100k+ products for a seamless and enhanced shopping experience.

THEORDINARYGIFT

Tech Stack: Wordpress, WooCommerce API, HTML5, CSS3, JavaScript, PHP, Canvas, Custom Plugin and Designing etc.
Role: Designed and developed the entire plateform.

TheOrdinaryGift is a unique e-commerce platform developed on WordPress. It features an intuitive designer tool for effortlessly customizing shirts and plates, providing users with a personalized and enhanced shopping experience. Proof of work, including a backend video demonstration, is available for validation.

VIDEO COURSE STREAMING PLATFORM

Tech Stack: JavaScript, Node JS, Laravel, PHP.
Role: Designed and developed the entire backend infrastructure.

The platform supports video course sales, private teacher bookings, chat interactions, certification processes, and live streaming. It ensures a seamless and secure user experience with integrated features like Google Calendar synchronization and Stripe Connect-like functionalities.

ETECH

Tech Stack: HTML5, CSS3, JavaScript, Apollo, React JS, SendGrid, AWS, PWA & GraphQL etc.
Role: Senior Frontend Developer.

Etch is a digital product agency that is dedicated to creating digital platforms and experiences that have a positive impact on people, businesses, and society.
